Spalding County Emergency Management Offers Fan Donations and Beat the Heat Tips

Summer in Georgia is a time for camping trips, cookouts and afternoons by the pool. However, it's also a time to be aware of the dangers soaring temperatures can bring. Extreme heat is the No. 2 weather-related killer in the U.S. after excessive cold, according to the Centers for Disease Control and Prevention. Spalding County Emergency Management Agency (EMA) urges Spalding County residents to take steps now to beat the heat.

"People most at risk for heat-related illness are seniors, infants and people with circulation problems, but staying indoors and drinking plenty of water will help you stay cool and hydrated when temperatures rise," says Spalding County EMA Director Kenny West.

To assist with residents in our community with coping with extreme heat, the Spalding County EMA will have a **limited amount of fans that will be available on a first come – first serve basis for residents, one (1) fan per household**. This opportunity to offer fans to residents of Spalding County comes through an allotment from the Community Services Block Grant as administered by the Georgia Department of Human Services, Office of Family Independence.

In order to receive a fan, you must adhere to the following program requirements:

- **Call or visit the Spalding County Emergency Management Agency at 770-228-2129 or visit the office located at 1005 Memorial Drive.**
- **Provide a photo ID or some other form of identification.**
- **Provide proof of residency (for example a utility bill, credit card bill, etc.).**

Spalding County and *Ready Georgia* give these 10 tips to counter the extreme heat for every family:

1. Never leave children or pets alone in closed vehicles.
2. Fluids are lost through perspiration, so it's important to stay well hydrated. Drink plenty of water, even when you're not thirsty.
3. Stay indoors in air-conditioned spaces as much as possible and limit exposure to the sun.

4. Dress in loose-fitting, lightweight and light-colored clothes that cover as much skin as possible.
5. Avoid strenuous work during the warmest part of the day. Drink two to four cups of water every hour when you are working outside.
6. Check on elderly neighbors and family and friends who do not have air conditioning.
7. Make sure pets have plenty of water and shade, be careful to not over-exercise them, and keep them indoors when it's extremely hot.
8. Familiarize yourself with the symptoms of heat exhaustion and heat stroke. Heat exhaustion symptoms are heavy sweating, fatigue, muscle cramps, confusion, cold, pale and clammy skin, a weak rapid pulse, and possible fainting and vomiting. Heat stroke is a severe medical emergency that occurs when the body temperature reaches 106° F. or higher. Symptoms include hot dry skin, rapid and strong pulse, and possible unconsciousness. Summon immediate emergency medical assistance.
9. Insulate your home by installing weather stripping around your doors and windowsills to keep the cool air inside.
10. Closely monitor a local radio station, TV station or NOAA Weather Radio or download the *Ready Georgia* app for the latest information on excessive heat watches and warnings.

To help Georgians prepare, *Ready Georgia*, a statewide emergency preparedness campaign created by the Georgia Emergency Management Agency/Homeland Security, offers the tools needed to make an emergency supply kit, develop a communications plan and stay informed about potential threats. Visitors to *Ready Georgia's* [website](#) can create an online profile to receive a tailored plan for the entire family that includes the specific amount of supplies to put in their household Ready kits. In addition, the newly upgraded free *Ready Georgia* [mobile app](#) provides weather alerts, traffic updates and preparedness information for people on the go.

For more information, contact Spalding County Emergency Management at (770)228-2129 or visit Ready Georgia at www.ready.ga.gov.
