

## WHAT IS AN ILLICIT DISCHARGE?

An Illicit discharge is any direct or indirect non-stormwater discharge to the Spalding County Municipal Separate Storm Sewer System (MS4). Non-stormwater discharges can be discharges that occur due to spills, dumping and illicit connections to the MS4 from residential, industrial, commercial or institutional establishments.

The Spalding County **Municipal Separate Storm Sewer System (MS4)** is any facility designed or used for collecting and/or conveying stormwater, including municipal roads with drainage systems, curbs, gutters, inlets, catch basins, piped storm drains, structural stormwater controls, ditches, swales, reservoirs, and other drainage structures, and which is:

- Owned or maintained by the county
- Not a combined sewer; and not part of a publicly-owned treatment works.

An **Illicit connection** means either of the following:

- Any pipe, channel, drain or conveyance that allows an illicit discharge to enter the storm drain system
- Any pipe, channel, drain or conveyance connected to the Spalding County MS4 which has not been documented in plans, maps, or equivalent records and approved by an authorized enforcement agency.

**Potential sources of Illicit Discharges may include:**

- Improper disposal of automotive fluids
- Leaking dumpsters
- Failing septic systems
- Sanitary sewer cross connections or overflows
- Wash water from business operations
- Spills
- Wash water from construction related waste (.e.g. concrete, paint, stains, etc.)

A few common signs of illicit discharges include staining of the curb/gutter and/or street, residues, oil sheens, discoloration of water bodies, odors, turbid or cloudy water, soap suds, and dry weather flows in periods with no rain.

# WHAT IS AN ILLICIT DISCHARGE?

## Exemptions

The following discharges are **not** considered illicit discharges:

- Water line flushing performed by a government agency
- Flows from potable water sources
- Landscape irrigation or lawn watering
- Ground water infiltration into storm drains, uncontaminated pumped ground water, foundation or footing drains, and crawl space pumps
- Air conditioning condensation
- Discharges or flows from firefighting activities, or other discharges necessary to protect public health and safety
- Non-stormwater discharges permitted under an NPDES permit
- Diverted stream flows, springs, natural riparian habitat or wetland flows
- Any other water source not containing pollutants
